Week 1 Report

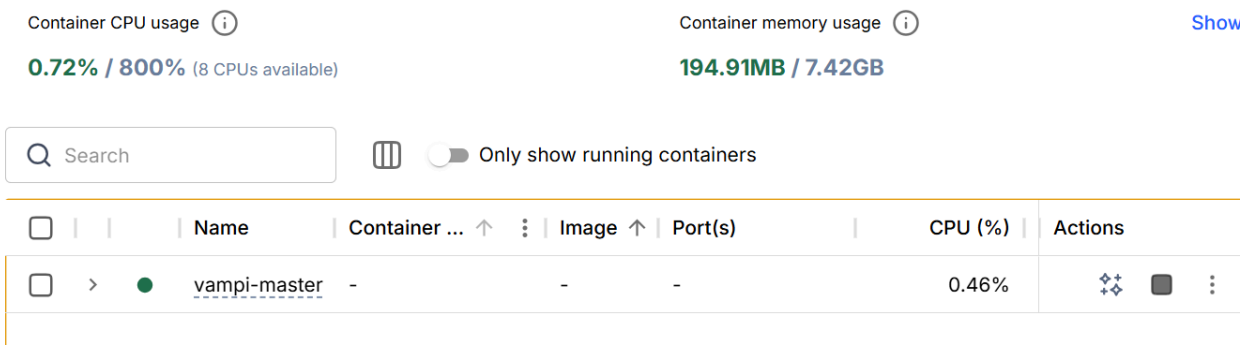
Name: Annie Stephen Bassey
Admission ID: CSF/API/00250596

A Summary What I Learnt This Week:

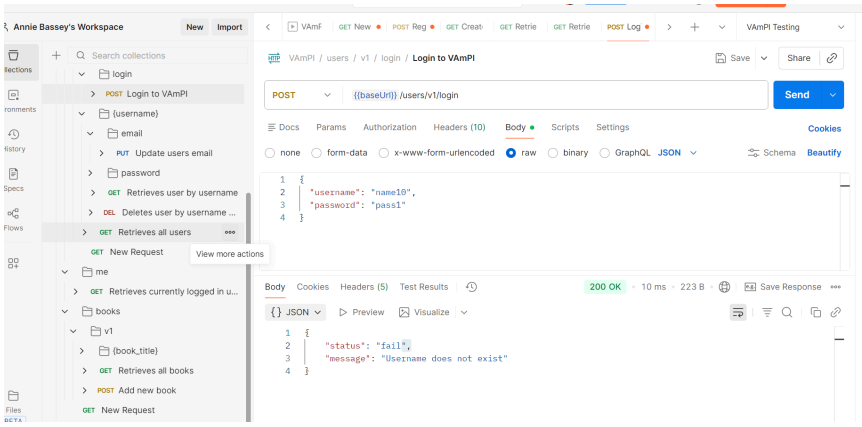
In this week i learnt the fundamentals of API Security, how API works, its function in merging services together and presenting it to the user via UI, I also learnt about the OWASP API top 10 ,how APIs are not as hidden as most people would like to think, how API are not mostly tested for security but functionality and as such lead to the creation of vulnerable APIs. I learnt how to set up Postman and used it in testing for vulnerabilities with an API.

Lab progress and supporting screenshots

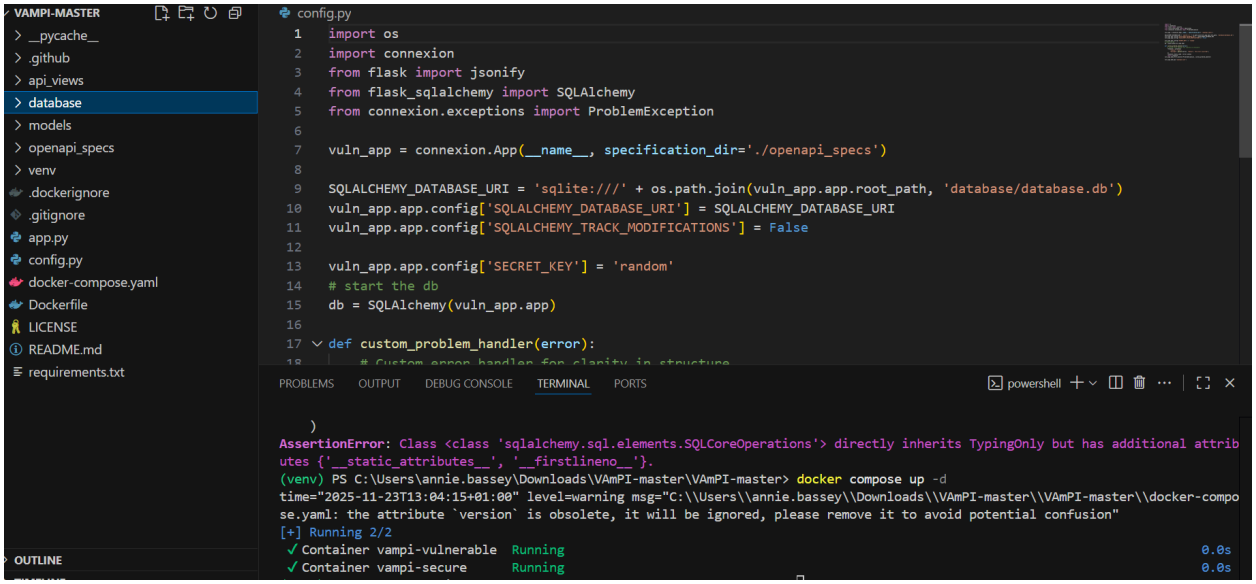
My Docker Setup



My Postman



My Vs code

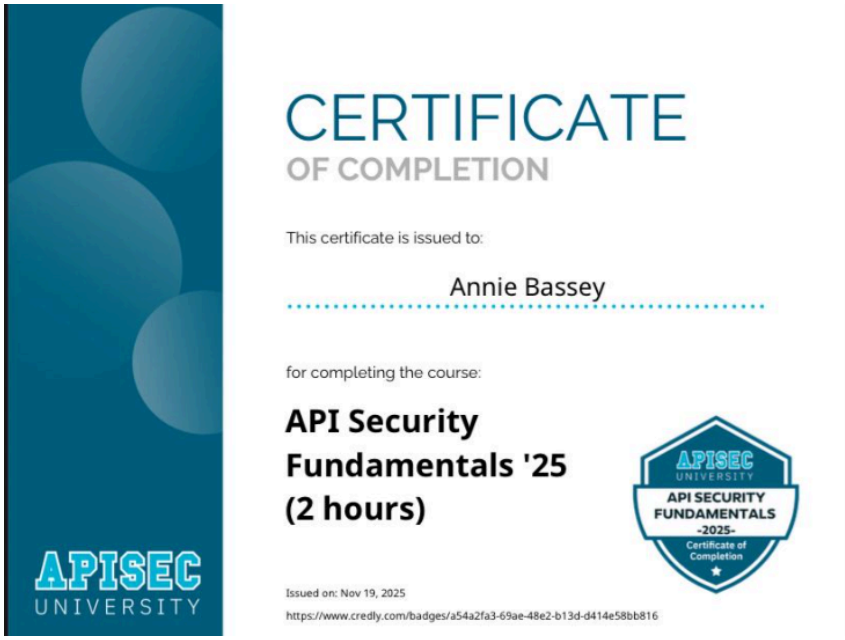


Any blockers or questions encountered

I had a few blockers, which with more research and asking question i was able to get over a few of them where :

- Set up and converting the swagger to postman
- Postman setup
- Troubles shooting some errors on why the application was not running
- Understanding how to read the files and interpret the results I was getting

Screenshot showing module completion or certificate



APISEC UNIVERSITY

CERTIFICATE
OF COMPLETION

This certificate is issued to:

Annie Bassey

for completing the course:

API Security Fundamentals '25 (2 hours)

APISEC UNIVERSITY
API SECURITY FUNDAMENTALS
-2025-
Certificate of Completion

Issued on: Nov 19, 2025
